

Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer

Team Project Documentation

Project	Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer
Document	02. 02. Define Problem Statements
Team Lead	Manikandan
Team Members	Sree Vasam, Ratheesh, Chachin, Mathew

Prepared for ServiceNow Flow Designer project submission

Problem Statement

The current IT procurement process lacks efficiency and automation, particularly for Standard Laptop orders. Requests may require configuration after approval, but the step is prone to oversight or delay, creating manual work and potential waiting time.

Affected Stakeholders

- Employees requesting laptops.
- IT procurement team.
- Hardware team.
- IT operations/service desk.

Current-State Issues

Issue	Effect
Manual task creation	Additional IT effort
Configuration step missed/delayed	Laptop readiness may be delayed
Manual assignment	Extra routing effort
Inconsistent task information	Less standardized hand-off

Target Problem Statement

How might the IT procurement team automate creation and assignment of the Standard Laptop configuration task after approval so the Hardware team can begin configuration promptly and consistently?
