

Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer

Team Project Documentation

Project	Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer
Document	05. 05. Problem–Solution Fit
Team Lead	Manikandan
Team Members	Sree Vasam, Ratheesh, Chachin, Mathew

Prepared for ServiceNow Flow Designer project submission

Problem

Standard Laptop requests can require manual configuration-task creation and assignment after approval.

Solution

Create a Flow Designer flow named “Standard laptop task” that creates a Catalog Task for the Requested Item and assigns it to Hardware.

Fit Mapping

Need	Solution Feature	Expected Result
Timely configuration	Automatic task creation	Configuration work is initiated
Clear ownership	Hardware assignment	Task reaches responsible team
Consistent instruction	Standard text	Clear task information
Reduced manual work	Flow Designer	Fewer manual hand-offs
Traceability	RITM-linked task	Request/task connected

Success Indicators

- Approved request produces a Catalog Task.
- Task has the intended configuration instruction.
- Task is assigned to Hardware.
- Manual task creation is not required in the intended scenario.
