

Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer

Team Project Documentation

Project	Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer
Document	08. 08. DFD and User Stories
Team Lead	Manikandan
Team Members	Sree Vasam, Ratheesh, Chachin, Mathew

Prepared for ServiceNow Flow Designer project submission

Data Flow

Employee submits a Standard Laptop request. Service Catalog creates the request and RITM. After approval, Flow Designer creates a Catalog Task linked to the RITM and routes it to Hardware.

Level-1 DFD

Step	From	Process	To
1	Employee	Select Standard Laptop / Order	Service Catalog
2	Service Catalog	Create Request / RITM	Approval
3	Approver	Approve request	Approved RITM
4	Flow Designer	Create Catalog Task	Hardware
5	Hardware	Configure laptop	Fulfillment

User Stories

- As an employee, I want to order a Standard Laptop from Service Catalog.
- As an IT procurement member, I want the configuration task generated automatically after approval.
- As a Hardware team member, I want the task assigned to my group.
- As an IT operations user, I want the task linked to the Requested Item.

Acceptance Criteria

- Approved request creates a Catalog Task.
- Task has the configured short description.
- Task has the configured description.
- Assignment group is Hardware.
- Task is visible under RITM → Catalog Tasks.
