

Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer

Team Project Documentation

Project	Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer
Document	11. 11. Functional and Performance Testing
Team Lead	Manikandan
Team Members	Sree Vasam, Ratheesh, Chachin, Mathew

Prepared for ServiceNow Flow Designer project submission

Functional Test Cases

ID	Scenario	Expected Result
TC-01	Open Standard Laptop	Item available
TC-02	Order item	Request/RITM created
TC-03	Approve request	Approved state recorded
TC-04	Process request	Catalog Task generated
TC-05	Check short description	Configured text appears
TC-06	Check description	Configured text appears
TC-07	Check assignment	Hardware assigned
TC-08	Check visibility	Task appears under RITM
TC-09	Check activation	Active flow executes

Operational Checks

- Verify manual task creation is not required.
- Verify consistent Hardware routing.
- Check for unintended duplicate tasks.
- Verify request-to-task traceability.
- Record actual execution observations.

Result Rule

Use Pass/Fail only after executing the test case in the configured ServiceNow instance.
