

Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer

Team Project Documentation

Project	Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer
Document	12. 12. User Acceptance Testing (UAT)
Team Lead	Manikandan
Team Members	Sree Vasam, Ratheesh, Chachin, Mathew

Prepared for ServiceNow Flow Designer project submission

UAT Objective

Validate that the automated Standard Laptop workflow satisfies the intended business process from ordering and approval through Hardware task creation.

UAT Scenarios

ID	Scenario	Acceptance Condition
UAT-01	Order Standard Laptop	Request created
UAT-02	Approve request	Request can proceed
UAT-03	Task generation	Catalog Task created
UAT-04	Task ownership	Hardware assigned
UAT-05	Task information	Required text populated
UAT-06	Traceability	Task visible under RITM

Acceptance Criteria

- Ordering is understandable.
- Approved request produces expected task.
- Hardware receives task.
- Task contains sufficient configuration information.
- Request and task can be traced together.

Sign-off

Record acceptance after execution. Do not pre-mark Pass/Fail without evidence.
